

# JASHWANTH B

Bangalore, Karnataka, India | +91 XXXXX-XXXXX | jashwanth.b@email.com | linkedin.com/in/jashwanth-b

## PROFESSIONAL SUMMARY

Detail-oriented Engineering professional with hands-on experience in full-stack development, industrial automation, data analysis, and process optimization. Proven track record of executing structured technical workflows, identifying system bottlenecks, and implementing real-time tracking solutions within demanding factory environments. Possesses a strong analytical foundation in data interpretation, root-cause analysis, and dashboard design. Eager to leverage foundational engineering principles, technical problem-solving, and a data-driven mindset to drive the Prepare–Monitor–Act (PMA) quality framework and support continuous improvement initiatives as a Quality Analyst at IBM Finance & Operations.

## CORE COMPETENCIES

|                          |                                                                                                                 |
|--------------------------|-----------------------------------------------------------------------------------------------------------------|
| Process & Quality:       | Root Cause Analysis (RCA), Process Mapping, SLA Adherence Monitoring, Defect Tracking, Workflow Standardization |
| Data & Dashboards:       | Power BI, Advanced Excel (Pivot Tables, Data Modeling), Trend Analysis, Performance Metrics                     |
| Technical Stack:         | Java, Spring Boot, React, SQL/Database Management, Workflow Automation Enablement                               |
| Professional Attributes: | Cross-functional Collaboration, Stakeholder Communication, Problem-solving, Technical Documentation             |

## EDUCATION

|                                |                      |
|--------------------------------|----------------------|
| Bachelor of Engineering (B.E.) | Bangalore, Karnataka |
| VTU Affiliate College          |                      |

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Technical Intern                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | January 2026 – Present |
| Rail Wheel Factory                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                        |
| <ul style="list-style-type: none"><li>Designed and implemented a real-time vehicle tracking and axle-counting system to monitor truck cargo and movement accuracy across factory zones.</li><li>Analyzed operational bottlenecks and data streams to minimize tracking discrepancies, contributing directly to higher process visibility and transaction accuracy.</li><li>Collaborated with cross-functional engineering and operations teams to translate floor requirements into functional digital dashboard tracking systems.</li><li>Drafted technical documentation and blueprints ensuring strict adherence to site governance, safety protocols, and operational compliance standards.</li></ul> |                        |

*Academic Initiatives*

- **Sustainable Fertilizer Usage Optimizer:** Architected a predictive recommendation engine utilizing Java and Spring Boot. Formulated UI workflows and managed a 17-week development Gantt chart to guarantee milestone adherence and minimize project delivery delays.
- **BHOOMI Android Application:** Resolved complex Gradle repository conflicts, synchronized third-party Weather APIs, and conducted systematic debugging to eliminate build defects, ensuring first-time-right execution.

## TECHNICAL PROJECTS

---

### Real-Time Factory Vehicle Tracking & Axle-Counting System

- Developed a localized computer vision and tracking framework to automate the data collection of moving cargo vehicles.
- Built reporting views to monitor SLA compliance regarding transit times, providing leadership with clear insights into logistics throughput and process variability.

## IBM ROLE ALIGNMENT & VALUE PROPOSITION

---

- **PMA Framework Readiness:** Prepared to apply structured engineering logic to the Prepare-Monitor-Act lifecycle—defining system standards, executing targeted quality audits, and driving corrective scripts.
- **Lean Mindset:** Adept at finding engineering root causes (RCA) and eliminating code/process rework, aligning directly with the objectives of Lean Six Sigma methodologies.
- **Automation & Tools:** Strong foundation in software architectures (Java, React, SQL), making me highly effective in collaborating with digital/IT teams for RPA, ServiceNow/SAP data integration, and quality monitoring automation.
